DELHIVERY

New in Release 23.1

1. Addition of Tracking ID to Track the Bulk Order

Current feature	What's New
• Each item gets an order ID before shipping. • Order ID tracks the delivery status of the Items.	• Each bulk package gets a tracking ID before shipping. • Enter tracking ID to get the live delivery status of a bulk order.

How does it help?
- Bulk items can be tracked easily.
- Saves time.

2. Automatic Calculation of Shipment Price through XMP Scanner

Current feature	What's New
• Manual calculation of shipment price is done.	• XMP Scanner automatically calculates the shipment price within seconds.

How does it help?
- Reduces manual intervention.

3. Mapping of New Routes in the Database

Current feature	What's New
• Routes are specified in the database for the delivery agents. • Unsaved route zones show error in delivery.	• New routes can be mapped by delivery agents as per convenience. • New route is saved in the database.

How does it help?
- Helps in faster and multiple deliveries at once.

Fixed Issues in Release 23.1

- Fixed: The price of COD items is not saved in the database.
- Fixed: Payment processing is slow, shows 'failed/incomplete' even after transaction.
